

JIRAT PANUNTA

AI Engineer Intern

Address: 139/37 Phahonyothin Road, Mae Tam Subdistrict, Mueang Phayao District, Phayao 56000, Thailand
Phone: 094-876-0595
Email: panuntajirat@gmail.com
GitHub: jiratong.github.io
Portfolio: <https://jirat-portfolio.vercel.app/>

SUMMARY

An adaptable Computer Science student with foundational knowledge in application development and hands-on project experience. Seeking a rewarding internship opportunity to expand my technical expertise and gain practical industry insights. Dedicated to continuous self-improvement and ready to acquire new skills to support team goals

EDUCATION

Bachelor of Science (Computer Science)
University of Phayao — School of Information and Communication Technology (2023 - current)
GPA: 3.68 / 4
High School Diploma in Arts-Language (English)
Phayaophitthayakhom School — (2020 - 2023)

PROJECT

Rally Application – Real-Time Pose Analysis Mobile Application for IOT Control | 2024 - 2025 (Capstone Project)

- Designed and developed a cross-platform mobile application using Flutter to manage user interfaces and handle real-time mobile camera feed capture.
- Integrated Google ML Kit Pose Detection API to track and analyze real-time human skeletal coordinates via the device camera stream.
- Integrated K-Nearest Neighbors (KNN) algorithms and a 3-State Machine framework to differentiate and validate real-time user-defined gestures.
- Integrated Firebase Realtime Database to facilitate low-latency, real-time command transmission and secure user-defined gesture datasets.
- Applied ROS TurtleSim simulation to test command transmission, translating recognized gesture data into velocity commands to control a simulated robot in a 2D environment.

Moto-Maintenance – LLM-Powered Motorcycle Maintenance Platform | 2026 (Personal Project)

- Architected a responsive web application using Next.js, TypeScript, and Tailwind CSS, featuring an interactive vehicle interface with custom coordinate hotspot pins mapped over motorcycle imagery for intuitive component inspection and maintenance tracking.
- Integrated Google Gemini API via custom REST endpoints to build an AI Mechanic Assistant, engineering system prompts that inject domain-specific motorcycle data to provide manual-aligned diagnostic recommendations.
- Implemented a multi-model fallback architecture that dynamically switches across Generative AI model variants, gracefully handling rate limits (HTTP 429) and endpoint availability to ensure uninterrupted service uptime.
- Optimized cross-device usability by designing collapsible sidebars and touch-friendly bottom-sheet chat interfaces, deploying the full-stack system on Vercel with serverless API route management.

WORK EXPERIENCE

Makro (Part - time) | March 2025 - May 2025

OCS (Online Customer Service)

- Picked and packed dynamic customer orders efficiently via the Makro PRO application and alternative ordering channels.
- Verified order accuracy and proactively coordinated with the delivery department or contacted customers to resolve stockout issues.
- Managed and processed invoices, tax receipts, and internal inventory transfer documentation accurately.

SKILLS

- Programming Languages:** Dart, Python, C, C++, CSS, JavaScript
- Technical Tools:** Git & GitHub, VS Code, Microsoft Office, Canva, Figma, Vercel
- Soft Skills:** Teamwork & Collaboration, Fast Learner, Technical Documentation, Effective Communication, Problem-Solving, Time Management
- Languages:** Thai (Native), English (Basic Working Proficiency)
